

Artist Statement 100 Words

I am an oil painter who has created my Extraterrestrial Series of artworks with oil paint on self-constructed panels with a colored ground of dry pigment and rabbit skin glue. I am inspired by sci-fi and fantasy books/movies, spirituality, sleep paralysis, the interdimensional, and the thin line between wake and sleep. I create a visual, non-linear timeline to postulate what E.Ts. look like, inspired by E.T. contact accounts, personal experience, and references to human anatomy to question the nature of humankind and its existence via symbolic imagery to create a universal mythology which the viewer may create their own narratives.
